## Coronavirus COVID - 19 Second Supplementary Budget Speech Honourable Sili Epa Tuioti - Minister of Finance 07 april 2020

Mr. Speaker and Honourable Members of Parliament,

On behalf of the Government, I would like to table the Second Supplementary Budget for the financial year 2019/20 for the consideration of the House.

**Mr. Speaker,**

First and foremost, we give thanks to our Heavenly Father for his blessings upon our nation which has made it possible for us to gather today so we may fulfill our duties whilst our nation remains protected from the pandemic that is currently claiming the lives of many across the globe.

This past December, the First Supplementary Estimates was laid before Parliament in response to the effects of the Measles Epidemic. For the past six months, the Government has effectively actioned and put into place the necessary policies to protect our nation from anymore epidemics to come as well as to try and revert our economy back to pre-epidemic levels.

These are unprecedented times that we live in as we bear witness to a global devastation never seen before since World War II. Not only has the Coronavirus affected the lives and livelihoods of people across the globe but it will undoubtedly also have a detrimental effect on the world's economy.

**Mr. Speaker,**

It was in January of this year, when the world were made aware of the Coronavirus epidemic that was affecting the Wuhan Province of China. Whilst the Chinese Government were working at containing the spread of the virus and trying to find a cure, no other country in the world – not even those with the expertise to create a vaccine, could have imagined that this virus would have such devastating effects on the rest of the world.

It has been 4 months now since the virus was made known to the world and since then it has undoubtedly brought great suffering to many countries across the globe. The pandemic has completely changed the environment within which the world now lives in particular in countries who have declared States of Emergency - like Samoa, in a bid to try and control the spread of this deadly virus.

The international organisations tasked with overseeing the compilation of economic statistics for the World have also publicized

and revised all their projections to reflect the devastating effects on the global economy. Earlier this year, projections were still optimistic anticipating a 3.3% growth for the global economy for 2020. However, this has now been revised down to 2.4% or less depending on how long the spread of the virus continues. The revising down of the global GDP is due primarily to the closing of many industrial companies which has affected international trade; global unemployment has increased; large enterprises have been forced to close particularly large airlines upon which much of the world's development rely on and money markets have been affected thus affecting foreign reserves for many countries.

**Mr. Speaker,**

Economic growth for Samoa in the current fiscal year was projected at 3.7% to be driven largely by regional meetings that were to be hosted locally as well as the anticipated growth in international market demands and the hospitality sector.

Unfortunately, the travel bans across the globe have now put a halt to all travelers for fear of the spread of the Coronavirus. For Samoa alone, our Tourism industry has taken a huge hit as the Coronavirus comes immediately at the heels of the detrimental effects of the Measles epidemic. This means that many of the regional meetings and events proposed to be hosted within Samoa is now uncertain. Other effects on the economy include the disruptions to our usual trade markets especially in countries where Samoa's diaspora are common therefore affecting remittances.

Growth projections for Samoa has now been revised and it is anticipated that growth will be negative 2.2% for the current fiscal year. These revised projections are inline with the revisions for the global economy.

**Mr. Speaker,**

The Korona Virus pandemic has been likened by many as a "Social and Economic Tsunami". This is due to the devastating effects of the pandemic that is nondiscriminatory and affects any person therefore affecting Government operations, businesses and companies upon which the livelihoods and services of any nation rely on particularly the manufacturing industries overseas.

The social welfare and prosperous future of any nation therefore relies heavily on the

# No government lay-offs, assures Finance Minister

**By Nanai Taofiga Laveitiga Tuiletufuga**

“All public servants will remain employed,” reassures Finance Minister Sili Epa Tuioti in tabling the Second Supplementary Budget 2019-2020 yesterday morning.

To ensure no disruptions in public service, all recruitment and selection of the public service will be fast tracked to ensure that all those seeking employment will be hired as soon as possible.

“Free healthcare for senior citizens, maternal health and children below 15years old will continue,” he added.

Also to stimulate the economy, all Government projects including developments for roads, airport and water to ensure income generation opportunities for those involved will also continue.

While Government accounts with the private sector to be cleared as soon as possible;

Government will consider support to small businesses through assistance via the Development Bank within the next 3months and for the protection of consumers, the Price Control Board is now activated.

In his submission address Sili noted that the assistance package before Parliament is an initial policy response to effect change in the next 3 – 6months and targets specific areas of the economy as highlighted below:

- Health Response;
- Enabling the Private Sector;
- Securing the Purchasing Power of Citizens;
- Food Security in the Agricultural Sector;
- Multi-sectoral Response.

“The aggregated value of this assistance is \$66.3million tala which is a considerable amount given the implementation within the next 3 – 6 months. This means that there is the possibility of another round of assistance by the Government to be announced in the Main Estimates for the fiscal year 2020/21,” reiterated the Finance Minister.

# No links between COVID 19 and 5G technology

Press Release 7th April 2020 - In light of untrue videos and articles being circulated on various platforms; the Office of the Regulator finds it very important to issue this press statement to inform the public:

“To date there is not authentic link between COVID-19 and 5G Technology”; and

“In addition to this 5G has not been launched in Samoa and therefore there are no equipment in operation”.

“5G, or fifth Generation, is the latest wireless mobile phone technology, first widely deployed in 2019. 5G is expected to increase performance and a wide range of new applications, including strength-

ening e-Health (telemedicine, remote surveillance, telesurgery)” (World Health Organization).

Our telecommunications service providers are working tirelessly around the clock to keep vital health, education and emergency services in operation; as well as ensuring friends and families continue to communicate as we try to endure the COVID-19 threat. Because of the fake news that have been circulated about 5G and its connection to COVID-19 we are witnessing in other countries people are destroying critical infrastructure that keeps them connected. It is important that we as a nation understand that there is no 5G threat so that we do not result to destroying critical infrastructure at this time of difficulty and

when it is mostly needed.

This press release also informs the public that it is an offence under the Telecommunications Act to damage any telecommunications network or related telecommunications facility; anyone found to be in contravention of the law will be dealt with accordingly.

### Second Supplementary Budget Speech Honourable Sili Epa Tuioti - Minister of Finance - 07 april 2020

policy actions and decisions to be made by its leaders. It is our belief that the solutions to ensuring the future of this nation lies within our borders and we have at our fingers the necessary tools to ensure smooth sailing for our economy that will secure a quality of life for every citizen.

The Government's commitment maintains that the priority will be the safety and security of Samoa from any disaster that could eventuate. It is therefore imperative that the economy must be strong and stable enough to sustain the security of the nation. The Government has therefore decided extend its support to the country during these uncertain times through the provision of a set of policy response actions. Our nation is a small island developing state and has little by way of resources. We also have a small economy that is easily threatened by any ensuing disaster. Therefore, our policy response must be matched against whatever resources are currently available along with the assistance provided by our development partners which are usually tagged to specific programs.

#### Mr. Speaker,

This Second Supplementary Estimates has been put together in urgency to ensure that resources can be mobilized immediately to areas that must be enforced so that protection and prevention can continue for the nation. Furthermore, there is a need to release the assistance to the private sector and citizens as soon as possible so they may cope with the effects of the pandemic.

#### Mr. Speaker,

At this point it is uncertain how long this pandemic will continue to effect the world. It is also uncertain as to when the trade and travel will normalize to effect development in our nation.

Coronavirus initiative. These sectors will work in close collaboration with the Ministry of Finance in the identification of key areas where resources will be required and they include:

### Mr. Speaker,

I am happy to report that the Government has conducted dialogues through the Ministry of Finance with the Central Bank and other commercial banks of the country. The ANZ, BSP, NBS and SCB have completed their internal reviews and have announced their own separate assistance to the nation for the next 3 months. Their terms and conditions vary not only from bank to bank but also from individuals, businesses and their partners alike. It is therefore heartwarming to note that there exists a willingness within the banking community to help our nation through these trialling times. I am confident that the above banks continue to review their relief packages so that more assistance can be extended to their valued clients and should be made available within the next 6 months.
